On Occasion of
Celebrating National Chemistry Week 2022
(16th October to 22th October 2022)
organise
Guest Lecture on "Fabulous Fiber-The Chemistry of Fabrics"

Notice

19/10/2022

All the PG students (M. Sc. I and M. Sc. II) are hereby informed that Department of Chemistry has Celebrating National Chemistry week 2022(16th October to 22th October 2022) by arranging guest lecture of Dr.Sachin Landage Textile and Engg. Institute on topic "Fabulous Fiber –The Chemistry of Fabrics" on 20th October, 2022 at 8.30 am in Karmaveer Auditorium. All M.Sc. I and M.Sc. II students must be present upto 8.15 am in Auditorium ,attendance is mandatory for this lecture.

Extension Activity Report 2022-2023

Title- Lab Awareness and Food Adulteration Awareness

The Chemistry Department of Yashwantrao Chavan Institute of Science, Satara Conducted Extension Activity on Lab Awareness and Food Adulteration Awareness for Junior College students at Mahatma Gandhi Junior College, Umbraj at 9 am to 11.30 am on Tuesday, 18/10/2022. This extension activity was introduced by Dr. P. V. Chavan giving information about our college, facilities and other activities taken in college. After that Dr. H. V. Hangerge gave information about job opportunities and research opportunities after completion of graduation and post graduation.

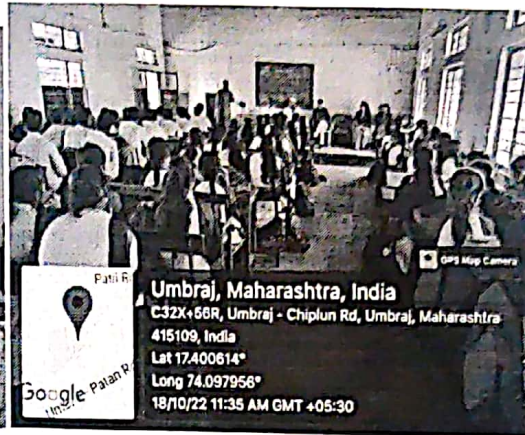

The aim of our extension activity is to create awareness about handling of hazardous chemicals and also create awareness about Food Adulteration in junior college students. This activity is helpful for the students at junior college level.

Miss. V. V. Pawar conducted the session on laboratory safety, handling of chemicals do's and don'ts in the laboratory. The involvement of the students was very excellent. We were able to convince the students in college and chemical lab staff to take every guideline seriously and it's for their own good to avoid the mishaps (accidents) in the chemical lab. The short instructions with clearly defined Do's and Don'ts in many places in the lab help everyone when they are in doubt. We learned handling chemicals is a responsible task but it can be fun too.

Miss. S. A. Babar conducted the session on Food Adulteration Awareness. She gave information about what are the impurities in food and how to recognize this impurity by using small experiments.

The support offered by the staff of Mahatma Gandhi college, Umbraj was appreciated by the coordinator. The activity was concluded by vote of thanks proposed by Miss. V. V. Walekar.

110 participants attended and were benefited by this activity. We are thankful to our Hon. Principal Dr. B. T. Jadhav, Vice-Principal Dr. J. J. Chavan and Dr. S. T. Mahanwar head department of chemistry for motivating to arrange and conduct this activity.
