Extension Activity Report 2022-2023
Title- To create awareness in people about effective use of First
aid kit

The aim of our extension activity is to create awareness about effective use of First aid kit in people. Through this activity we make people aware about effective use of first aid kit and knowledge of first aid. This activity promotes the sense of safety and well being amongst people, promoting them to be more alert and safe in the surroundings. awareness and desire to be accident free keeps more safe and secure, reducing the number of casualties and accidents.

Trained person save many lives by using the learning given in the first aid kit awareness. While it is natural for most of us to rush to support any injured person, a trained person is more reliable, confident and in control of himself and his actions while in trauma situations. Knowledge of first aid promotes a healthy, secure and a safer environment, and instills confidence amongst people, their families, their colleagues and associates. Basic first aid knowledge is very helpful in dealing with trauma situations.

Our team of BSc first year Drug Chemistry students of YCIS under the guidance of Drug Chemistry department faculty has made people aware about first aid kit. We visited Kamathipura areas in Satara and raised awareness about first aid kits. So they become aware about it and also explained the usefulness of it on human being.

This way people can get the First aid knowledge and Which is very useful for dealing with traumatic situations. Not only the medical help they give but also the confidence they show in case of an accident will be very helpful. Being trained in first aid is good for yourself and your community. Total 15 people benefited through activity which we conducted in Satara on 01st February 2023 under the guidance of Ms. Akshata Gole (Faculty).
