

Report

Department of Nanoscience and technology One Day Workshop

“Research instruments characterization technique at School of Nanoscience and Technology, SUK.”

Yashavantrao Chavan Institute of Science, Satara Department of Nanoscience and technology organized “one day workshop on research instrument characterization technique at school of Nanoscience & Technology Shivaji University Kolhapur” on 18/01/2020.

The theme of workshop to introduce student's to different synthesis techniques of nanomaterials using various equipments. Also to understand different techniques for characterization and applications of nanoparticles and thin film. This workshop was arranged in collaboration with SNST and Department of Nanoscience, Y.C.I.S. Satara college. They organized small introductory lecture for student's This lecture was carried out by Dr. Krushna Pawar. After that he showed different laboratories and characterization units. He also explained working and showed demonstrations of few synthesis equipments. There were 25 students from B.Sc. II and III have participated in this workshop.

Place: School of Nanoscience and Technology, SUK.

Date: 18/01/2020

Time: 11:00 am to 5:00 pm

Co-ordinator

Department of Nanoscience and technology
